

SUSTANON

Product ID: G55001

Form Inject

Concentration 250mg/mL

Schedule CIII – Rx Only

Route Of Adm. Intramuscular

Sustanon is a powerful steroid created by combining four different testosterone esters in a single solution. Sustanon is a form of testosterone replacement therapy (TRT), designed to provide sustained release of testosterone into the bloodstream over an extended period of time. This allows you to gain the benefits of the way each ester is consumed by the body by administering a mixture of both fast-acting and longer-acting esters in a single dosage. Sustanon is injectable and oil-based. Sustanon is blend of four testosterone esters: Testosterone propionate, Testosterone phenylpropionate, Testosterone cypionate, Testosterone decanoate. These esters make Sustanon one of the longest-lasting steroid compounds available today. It is an ideal compound for gaining size and increasing muscle strength. The propionate and phenylpropionate esters in this product are rapidly utilized and released into the circulation within the first four days. The remaining esters are much slower to release and remain active in the body for approximately two and three weeks. Like all testosterone products, Sustanon is a potent anabolic with significant androgenic activity. It is mainly used as a bulking drug and provides good gains in strength and muscle mass. Although testosterone inherently converts to estrogen, this injectable is noted to be slightly more tolerable than cypionate or enanthate. With Sustanon, blood levels of testosterone rise more slowly, so side effects do not begin as quickly. However, for equal blood hormone levels, testosterone will be broken down equally regardless of the ester. Also related to estrogen, water retention may be noticeable with Sustanon unless steps are taken to minimize estrogen. For individuals with hypogonadism or low testosterone levels, Sustanon can help relieve symptoms such as fatigue, low libido, mood swings. It lead to improved of all life and quality of life.

Storage Conditions and Warnings

DO NOT REFRIGERATE OR FREEZE
KEEP OUT OF REACH OF CHILDREN
STORE IN A COOL, DRY PLACE BETWEEN 15–25°C (59–77°F)
PROTECT FROM LIGHT AND MOISTURE
USE ONLY AS DIRECTED BY A HEALTHCARE PROFESSIONAL
