Product ID: G57852

Form Inject

Concentration 100mg/mL

Schedule CIII – Rx Only

Route Of Adm. Intramuscular

Testosterone Propionate has an excellent rapid testosterone effect. Thanks to its excellent anti-aging effects and versatile activity, Testosterone Propionate offers numerous benefits that come with optimizing your hormone profile to increase your all health and vitality. In the first few weeks, you can see a important increase in muscle mass and strength, as well as noticeable improvements in Cognitive function, Mood and Energy.

In this way, when using Testosterone Propionate for the first time users can gain up to 10-20 Lbs of lean muscle along with important fat loss. Also users can a younger-looking physique along with regular nutritional and physical exercise. You can followed by a gradual improvement in your all life including increased self-esteem and unlimited motivation for the remainder of your hormone treatment. Testosterone Propionate has a shorter half-life (approximately 2-3 day shorter) than other Testosterone esters. It is absorbed into your body at a faster rate than slower esters (like Enanthate or Cypionate) that take longer to work. So you can see results from your hormone therapy sooner.

Due to its half life;

Testosterone Propionate is less prone to water retention due to the ester you get. The result can be same because it's all the same hormone. It's just top at different times.
