

TRENBOLONE ACETATE

Product ID: G10161349

Form Inject

Concentration 100mg/mL

Schedule CIII – Rx Only

Route Of Adm. Intramuscular

Trenbolone Acetate is one of the most powerful anabolic steroids to date. The stabilization period of androgen receptors in muscle cells exceeds testosterone by three times.

When you take Trenbolone Acetate together with Testosterone, there is a important increase in strength in a short period of time, muscles become elastic and toned, and appetite increases due to the increase in the level of IGF-1 in the blood.

The drug helps to cope with heavy loads, quickly restores the body, increases strenght, accelerates metabolism, gives a constant feeling of hunger and effectively burns fat.
